

South Australian Early Commercialisation Fund **GRANTS**

| | | |
|---|---|---------------|
| A Backbone Computing Solution | HANS DB - an advanced online distributed platform for digital security | \$48k |
| Ailytic | Manufacturing Resource Optimisation Module for improved resource assignment decisions in complex production environments | \$218k |
| Arkwright Technologies | Fibre Optic Manometry technology for the Aeronautic Industry | \$50k |
| ART Lab Solutions | Media suite to enhance cattle IVF success rate for the global beef industry | \$50k |
| Athena Irrigation Technologies | Direct sensing technology to monitor plant water status for better irrigation management | \$30k |
| Beta Cell Technologies | Seeding device to support the process of developing an ectopic skin pancreas with the potential to treat/cure Type 1 diabetes | \$50k |
| Bliss Creativity | Creation of unique, technically advanced digital assets (brushes, chalk etc) to enhance and speed up digital creative processes | \$48k |
| ByGen | Conversion of Agricultural Wastes into High Value Functional Materials | \$217k |
| Bzpay Holdings | Innovative transaction platform solution for delivering efficiencies & financial benefits to settlement trade obligations | \$300k |
| Coolsan Australia | ChillSafe® C6 - large scale eco hygiene solution to reduce bacteria, moulds, yeast in refrigerated rooms/transport | \$41k |
| EcoJet Engineering | A novel 10kW Micro Gas Turbine technology | \$96k |
| Ferronova | Magnetic probe and tracer technology for use in various cancers | \$500k |
| First Frontier (Frontier Microscopy) | Automated asbestos analysis system | \$50k |
| Fivecast | A data collection and analysis platform that delivers insights from unstructured multimedia open source data | \$47k |
| Glaciem Cooling Technologies | CO ₂ Only Refrigeration System | \$150k |
| GPN Vaccines | A serotype-independent Streptococcus pneumoniae vaccine | \$300k |
| Group Kinetica | WeedSniper® device for targeted delivery of herbicides | \$50k |
| Inovor Technologies | InoSat - Nanosatellite bus | \$500k |
| Jackson Care Technologies | Internet of Things (Artificial intelligence) technology for disability and aged care living | \$324k |
| Jaws Innovation | Backflow prevention device that delivers reduction in water flow constriction | \$36k |
| Jiyu Group (Hop the Wall) | WeChat platform for Australian food & wine SMEs - allowing consumers to sell direct to China's B2C e-commerce marketplace | \$50k |
| Life Whisperer Diagnostics | Artificial intelligence-based decision support platform for early detection of viable embryos for IVF implantation | \$250k |
| Liquid Integrity Systems | Leak detection system (instantaneous) for lined liquid storage facilities | \$50k |
| Miniprobos | Development of photonics enabled medical imaging micro needles for industrial and surgical use | \$200k |
| Myriota | Satellite-based low-cost IoT connectivity for remote operations and asset tracking | \$300k |
| Nexus eCare | My eCare® platform to improve chronic disease management | \$50k |

South Australian Early Commercialisation Fund **GRANTS**

| | | |
|--|---|---------------|
| Odd Games | Distribution of racing games on multiple platforms simultaneously | \$150k |
| Ofreddi (Kondotto) | Development of a cloud-based framework for codeless business process automation | \$50k |
| Oncodx | Development of a screening test for early-stage ovarian cancer | \$50k |
| Optima Mining Systems | A novel vertical mining system | \$50k |
| Orange Tulips (Integrated Irrigation) | Soil sensor array to monitor plant stress | \$59k |
| Pfonr | Mobile phone networking app (with people-search technology) capable of obtaining key information and connecting people in real time | \$50k |
| Plasma Shield | Non-thermal (cold plasma) air purification technology | \$150k |
| Praxis Aeronautics | Solar powered drone with encapsulated solar cells | \$150k |
| Presagen | Artificial intelligence platform for automation of judgement-based tasks to increase productivity, performance and profit | \$50k |
| Preserve Health | PREPD – A novel hydration system with ability to increase the body's hydration potential | \$142k |
| Real Time Data | Deckhand - An integrated software solution to support decision making and reporting in the fishing industry | \$145k |
| Repeller | Aspray that repels pest snails from broad acre crop plants | \$50k |
| Rogue Lumens | Custom designed hardware and purpose-built software solution for exhibition booths | \$19k |
| Safe Ag Systems | Work, health and safety software/app compliance system to achieve workplace safety for agribusinesses | \$498k |
| Scrubbing Fumigants | Development of a fumigant capture technology | \$150k |
| Silentium Defence | Passive Radar System Development | \$200k |
| Sine Group | Visitor and contractor management software system | \$350k |
| SMR Automotive Australia | BioPen - handheld, 3D printing surgical device for regenerative surgical applications | \$150k |
| Somark | Industry Assistance package provided prior to TechInSA management of SAECF for establishment of a R&D hub in Adelaide | \$500k |
| TC Pinpoint | Cloud-based project management tool for retail tenancies | \$50k |
| Thuming (Moose Industries) | Adapta Bar seeder - precision seeding system adaptable for a wide range of farming practices | \$50k |
| Turbine Aeronautics Holdings | Small gas turbine engines for niche aviation markets | \$300k |
| Village Waters Australia | Clean water and electricity production module for use in remote areas | \$50k |
| Vinnovate | VinoCap - Innovative wine bottle closure technology | \$50k |
| Virtual Voices | Algorithms to automatically mix and adjust poor singing performances to high-quality performances | \$50k |
| Wheel Alert Technologies | Vehicle Wheel Safety and Reliability System | \$50k |
